Education

Bachelors in Computer Science and Minor in Sociology

Eastern Kentucky University, May 2021

Cumulative GPA: 3.5

Technical Skills

Languages: PHP, Javascript, HTML5, **Databases:** MongoDB, MySQL SQL.

Frameworks: Symfony, Vue.js, PHPUnit

Methodologies: Agile (Scrum), Code Reviews, Unit Testing, Debugging & Troubleshooting

Professional Experience

Junior Developer

Dec 2023 – Jul 2026

Scout

- Developed and maintained features for Scout's Symfony-based web portal, implementing new functionality and resolving production issues in a collaborative Agile environment.
- Built solutions using PHP, Symfony, and MongoDB while following established coding standards and best practices.
- Worked from Jira-managed user stories and bug tickets, participating in backlog refinement, sprint planning, story point estimation, and daily stand-ups.
- Performed peer code reviews to ensure code quality, maintainability, and adherence to team standards before QA validation.
- Collaborated closely with QA engineers to investigate, troubleshoot, and resolve defects discovered during testing.
- Expanded automated test coverage by writing and maintaining PHPUnit unit tests, improving application reliability and confidence in new feature development.
- Communicated effectively with teammates to troubleshoot complex issues, gather requirements, and deliver high-quality solutions on schedule.

Web Developer

Apr 2022 – Dec 2023

eLink Design

- Developed, maintained, and enhanced client websites using a custom PHP CMS, HTML, JavaScript, and Vue.js.
- Collaborated directly with clients to gather requirements, refine project scope, and deliver solutions aligned with business objectives.
- Integrated third-party services including QuickBooks, Stripe, and Twilio to support payment processing, communication, and business workflows.
- Diagnosed and resolved application, server, and deployment issues while partnering with support staff and fellow developers to minimize downtime.
